SKILLS

Backend

Python (5+ years) • TypeScript (6+ years) Node.js • NestJS • Express.js • Java REST APIs • ETL • data pipelines

AI

LLM APIs • function/Tool calling • TTS RAG • Generative AI • Agentic workflows

Frontend

HTML • CSS • React • Redux

Databases

PostgreSQL (7+ years) • MongoDB • MySQL • DynamoDB

Cloud and DevOps

AWS (5+ years) • Docker • Nginx • CI/CD

Leadership

Teams of 4-5 • hiring • architecture • system design

EDUCATION

NIT Allahabad

B.Tech, Computer Science
2015 – 2019 | Prayagraj, India
Cumulative GPA: 7.0/10

SELECTED PROJECTS

- **Dhoomak** - Backend from scratch to production, 2024
- **Prepp.in** - Rewrote the platform APIs from PHP to Node.js, 2021
- **PrayagTourism** - Led a 5-person team with district administration, 2018

ACHIEVEMENTS

- **Gold medal** for automated cricket video summarization, 2019
- Built and launched a **social media** platform alone in 2nd year of college, 2017
- Top 3 in HINT17 IIITA, Built desktop app for computers, that can help track, restrict application usage in machine. **STARE**

EXPERIENCE

Summary

Backend engineer with 7+ years building production APIs, data pipelines, and AWS infrastructure in fintech, HR-tech, and startups. Led teams of up to 5. Owns tax integrations at Deel. Founded and launched a B2B grocery platform in 25 days.

Deel | Software Engineer | Aug 2024 – present | San Francisco/Bangalore

- Founding engineer on Tax Integrations. Built backends that reduce reliance on external vendors for US tax reporting and filings.
- Own the MasterTax ETL pipeline that ingests, transforms, and normalizes filing data across tax jurisdictions for payroll.
- Use Claude and Cursor for implementation, debugging, refactors, and incident triage.
- On-call for production incidents and payroll client blockers across distributed services.

Dhoomak | Founder | Nov 2023 – Apr 2024 | Bangalore

- Founded a B2B grocery inventory and delivery platform for restaurants. Designed orders and subscription inventory.
- Shipped the MVP in 25 days, including backend, AWS, authentication, and production APIs.
- Hired for engineering and design. Released the Android app on the Play Store. **Code**

Payoneer | Senior Software Engineer | Jun 2022 – Oct 2023 | Hybrid

- Led a team of 4-5 engineers. Owned architecture and delivery for security, contracts, and payroll-adjacent features.
- Built a security deposit system that reduced fraud exposure and protected millions in revenue. Designed the backend and service-to-service communication.
- Delivered multi-contract support and salary revision, coordinating design and implementation with the team.

Collegedunia | Full-Stack Engineer | Jun 2019 – May 2021 | Gurgaon, India

- Migrated **Prepp** APIs from PHP to Node.js.
- Built Chrome extensions so the ops team could fill forms faster.
- Automated candidate onboarding. Cut HR work from multiple forms down to a few clicks.
- Automated ITR document collection for the finance team.

RECENT AI PROJECTS

- **Readymadereels** - Built end to end with Cursor and Claude. A few paying customers, 2026
- Built an Instagram pipeline from scratch in Cursor for trending.tomatoes (US-centered facts), knowurbodyy, techjobss, and sarkarinaukri.up
- Uses Reddit and job APIs, Gemini image and video models, neural TTS, ffmpeg, and Instagram Graph API to generate and publish reels on a schedule
