Deepak Bharti

Portfolio | Gmail | GitHub | LinkedIn | +91 7275036250

SKILLS

Backend

JavaScript • TypeScript • Node.js
NestJS • Express.js • Python
Java • Kotlin

Data & Integrations

ETL/data pipeline design • Third-party data ingestion/normalization (MasterTax) • batch data processing • GraphQL • REST APIs

Frontend

HTML • CSS • React • Redux

Databases

PostgreSQL • MongoDB • MySQL
DynamoDB

Cloud & DevOps

AWS • Docker • Nginx • CI/CD

Leadership

Team leadership 4-5 engineers, architecture ownership, hiring, cross-functional coordination, system design

EDUCATION

NIT Allahabad

B.Tech, Computer Science
2015 – 2019 | Prayagraj, India
Cumulative GPA: 7.0/10

SELECTED PROJECTS

- **Stealth Startup** - Built the entire backend infrastructure from scratch to production, 2024
- **Prepp.in** - Single-handedly rewrote all APIs from PHP to Node, 2021
- **PraygTourism** - Led 5 person team with district administration, 2018
- **Hohos** - Full-stack social media platform, 2017

ACHIEVEMENTS

- **Gold Medalist** Automated cricket video summarization, 2019
- Pursued my dream. Launched a (**social media platform**) all alone in 2nd year of college, 2017

EXPERIENCE

Summary

Senior Software Engineer with 7+ years building scalable backend systems, production data pipelines, and cloud infrastructure across fintech, HR-tech, and startup environments. Led engineering teams of up to 5 and owned third-party integrations (e.g. MasterTax) at production scale. Founder experience shipping a B2B e-commerce platform from zero to launch in 25 days.

Deel | Software Engineer | Aug 2024 – May 2026 | San Francisco, CA (Remote)

- Founding engineer on the Tax Integrations team, building systems to reduce dependency on external vendors for US tax reporting and filings.
- Own the data pipeline that ingests, transforms, and normalizes filing data to/from MasterTax across multiple tax jurisdictions for downstream payroll processing.
- Collaborated closely with product managers and external stakeholders to translate customer requirements and production feedback into scalable backend solutions, improving product reliability and user experience.
- Integrated Claude and Cursor for day-to-day engineering: accelerating feature development, AI-assisted debugging and refactoring, and rapid triage during live production incidents.
- Part of a 24x7 support rotation resolving critical production incidents and payroll client blockers by debugging across multiple distributed services.

Founder Experience | | Nov 2023 – Apr 2024 | New Delhi

- Founded a B2B subscription-based grocery inventory and delivery platform for restaurants; designed order management and subscription inventory end-to-end.
- Built and launched the MVP in 25 days, including backend infrastructure, AWS deployment pipelines, authentication, and production APIs.
- Led hiring for engineering and design; set up Play Store release for the mobile app. **Code**

Payoneer | Senior Software Engineer | Jun 2022 – Oct 2023 | Hybrid

- Formally led a team of 4–5 engineers, owning architecture decisions and delivery across security, contracts, and payroll-adjacent features.
- Led development of a security deposit system that reduced fraud exposure and protected millions in revenue; designed the backend architecture and inter-service communication for the feature.
- Drove the delivery of multi-contract support and salary revision features, coordinating design and implementation across the team.

Syfe | Software Engineer | May 2021 – Jun 2022 | Singapore (Remote)

- Improved Ops dashboard performance and reduced latency through backend and frontend optimizations using Spring Boot and Kotlin.

Collegedunia | Full-Stack Engineer | Jun 2019 – May 2021 | Gurgaon, India

- Single-handedly migrated PHP APIs to Nodejs for **Prepp**, built multiple chrome extensions to help ops team to automate filling forms and help in day to day work.
- Automated candidate onboarding process. Reduced HR team efforts from filling multiple forms to just a few clicks. Automated flows for Finance team for ITR docs collections.
